Who is he?  
Why does he always comfort me?  
He is my weatherman  
And he lets me know what's wrong

Don't tell him your secrets  
They haunt your burning soul  
Your mind, your thoughts, your life  
Turn to rain and cold yeah

(Chorus)  
Falling down is the skies  
Said said, said said the weatherman (x4)

Have you had a jump - chance  
One that brings you down  
A feeling of uneasiness  
It's in his mind - drown...

(Chorus)  
And you will see what you mean to me (x4)

(Chorus)
