Taking, taking the fruit  
letting it all wither away  
wither away, leaving mere hate  
Man has always abused his sister  
Yet it's she who feeds the child which will once again  
become man  
Fighting, fighting the wars  
the enemy slain, spoils for the victor  
(yet) mothers in pain, mothers in pain  
Dying, dying sea  
Our fragile womb, mother of all  
all living things, all living things

Man has always abused his sister  
Yet it's she who feeds the child which will once again  
become man  
Instinct of pride  
Think, think we not all  
in means of gain, until the womb  
can no longer sustain, no longer sustain  
Man has always abused his sister  
Yet it's she who feeds the child which will once again  
become man  
Instinct of pride
