Sometimes I think that love is somewhere
Living on an island all alone
I can see it in the darkness, I can feel it in the distance
Then it's gone

An' then I know it's time
That I go an' find my favorite girl
An' when I look into her eyes
I see all the love there is in all the world

An' it always will be
It always will be
It always will be
It always will be

There are some things I think about
An' every time I do, it breaks my heart
'Cause there's nothin' I can do
About the loneliness I feel when we're apart

An' I stop, claw the darkness
An' in the distance your face I see
An' when I look into your eyes
I see all the love there is inside of me

An' it always will be
It always will be
It always will be
It always will be

Then I know it's time
That I go an' find my favorite girl
When I look into her eyes
I see all the love there is in all the world

An' it always will be
It always will be
It always will be
It always will be
