Lady I know your out there somewhere
Like me your feeling lost
Maybe right now we both need each other
But our paths may never cross

People like us never find each other
And love is our greatest loss
Baby I know you are out there some where
But our paths may never cross

We're to people that should be together
'Cause we're lonely at the very same time
But there's a million to many good reasons
Why your love can never be mine

Maybe this song was written for you
Listen, and don't turn it off
I wish you could learn it
And come sing it with me
But our paths may never cross

We're to people that should be together
'Cause we're lonely at the very same time
But there's a million to many good reasons
Why your love can never be mine

Maybe this song was written for you
Listen, and don't turn it off
I wish you could learn it
And come sing it with me
But our paths may never cross
