This old road of love ain't for Sunday drivers  
Has very few survivors in a world of hit and run  
But we cared enough to hold on to each other  
We pulled the load together, look how far we've come

Our love is solid as a rock like the moon and stars  
We built our love to last like old Henry Ford builds cars  
Not one that falls apart after once around the block  
Our love is solid as a rock

Through the years we've learned, good things don't  
come easy  
And life's a little crazy and nothin's ever free  
All the tears and turns, ain't no bed of roses  
But we're about as close as two hearts could ever be

Our love is solid as a rock like the moon and stars  
We built our love to last like old Henry Ford builds cars  
Not one that falls apart after once around the block  
Our love is solid as a rock

Our love is solid as a rock not once around the block  
With sound 'round the clock and solid as a rock  
Our love is solid as a rock not once around the block  
With sound 'round the clock and solid as a rock
