What a twisted game you're playin' with the highest
takes of all
Somewhere along the way the rules got change
From this narrow ledge we're walkin' and there's no
way you can fall
Cause you're the only girl in the game
You're the only winner there's no way you can lose
And why I don't get out I can't explain
Any one decision you would be good news cause
you're the only girl in the game
You're the only girl in the game he was not invited still
he came
There can only be one loser and I already feel the pain
from the only girl in the game
[steel]
You're the only girl in the game...
