

## Thumlock "Modulator"

Visit "[Modulator](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Modulate the time, put a ripple through history  
Temporal vibrations, live it again  
The seed born of ancient philosophy  
Found again from a tomb made of stone

Gold orb controls druidic destiny  
Secret rituals locked in it's core  
It sees through the age of eternity  
Welcomes all to timeshift their mind

Modulate the time  
Vibrate history's line  
Travel through the plane  
Modulator

Dimensions entwined hold the key to the universe  
Chant the ghostly song, say the great wizard's name  
Feel the hum as it modulates space and time  
Live a story that's been and gone

Cold Earth, never touched by the sun  
Darkness reigns, ice covers all  
Travel on to when there was no universe  
Be there to witness creation's time

Modulate the time  
Vibrate history's line  
Travel through the plane  
Modulate again
