Follow me
In and around your head
We'll journey on through
What you feel inside

And it's calling you on and on
Knowing that you've waited
All your life

Follow me
Into this wonderland
And you'll discover
What you know is right

And it's calling you on and on (and on)

Knowing that you've waited
All your life
Calling you on and on
Knowing that you've waited for it
All your life

Calling you on and on (and on)
Knowing that you've waited
All your life
Calling you on and on
Knowing that you've waited for it
All your life
