Enrapture silence!  
In mediocre tragedie, mysterious darkness from a vast  
deep  
In the nightside of nature, of a misty borderland  
Under the endless spaces of the sky, powdered with  
nightly stars  
All of the untrammeled forces of nature

Calm quietness, eternal is listening in the sphere  
In grace  
It's awakening of the sleep

Calms the quietness... silents the silence  
From the endless spaces of the sky  
With nightly stars damnation nocturne will peal

Calm quietness, eternal is listening in the sphere  
In grace  
With might

Damnation nocturne will peal... will peal!

Silence enraptured!
