

## Tidfall "Empty Silence"

Visit "[Empty Silence](#)" on MotoLyrics.com

A black mist is falling  
Silence fills my mind  
Empty thoughts, but there is silence and anger  
Of something silent  
Cold and nothing

I feel strangled,  
Something inside that makes everything... black

Trapped inside me I close my eyes,  
Everything is black  
Nothing...  
Why...

There is no longer a difference between dream and  
reality  
My blood is cold and freezing, into infinity I fall  
Disappearing from everything I am walking in darkness  
No light I shall ever see... again

In this cold night I vanished  
From existential view
