Remembering the days
We laughed and we cried
Halted your moaning
A kiss in your eyes
Remembering your lips
When we first kissed
And the beat my heart
My heart has skipped

It's not the things you say
Not the things you say
Defying me to you
And it's not the things you say
Not the things you say
The matter

Oh how deep in ocean
Stare at the sun
I teased it with glistening
Haunted your soul
It's up into pull you
On full of last times
I'm scared of those demons
And dry up your eyes

It's not the things you say
Not the things you say
Defying me to you
And it's not the things you say
Not the things you say
The matter

In my mind I can feel you coming
In my mind I can feel you near
In my mind I can feel you coming
On to me

In my mind I can feel you coming
In my mind I can feel you near
In my mind I can feel you coming
On to me

It's not the things you say
Not the things you say
Defying me to you
And it's not the things she say
Not the things you say
The matter

It's not the things you say
Not the things you say
Defying me to you
And it's not the things you say
Not the things you say
The matter

I'm still waiting
Waiting for you
I'm still waiting
Waiting for you
