"To Forever"

Visit "[To Forever](#)" on MotoLyrics.com

[I see]
I see you and you see me [I see you, I see you]
There's only one thing this could be,
I think you know just what I mean
When I'm with you I feel so free

[So free x8]

And I love you and I hope you love me too
And I need you and I hope you need me too
Babe, I just hope that you know to never let me go
Cause when it comes to forever we should be together

When we meet up the whole world stops
The music louder, temperature drops
It seems like they're all dancing to our beat
Look around I know you'll see

[You'll see x3]
[See x3]

And I love you and I hope you love me too
And I need you and I hope you need me too
Babe, I just hope that you know to never let me go
Cause when it comes to forever we should be together

And I love you and I hope you love me too
And I need you and I hope you need me too
Babe, I just hope that you know to never let me go
Cause when it comes to forever we should be together

Babe, I just hope that you know to never let me go
Cause when it comes to forever we should be together
