

Tim Booth **"Monkey God"**

Visit "[Monkey God](#)" on MotoLyrics.com

We co-create our own fate
Everythings connected
God in man, man from ape
Everythings connected
We co-create our own fate
Everythings connected
Man from stars, man from ape
Everythings connected
My behaviours chemical, nurture biological
Determined by the stars in space
Don't rely on suicide
Meet you on the other side
Its not even your life to take
See things from the stratosphere
Were so unimportant here
What's the point in asking why?
Struggle of the underdog
Too much love or not enough
We die to live and live to die
Meanwhile in the stratosphere
Houston weve a problem here
Someones cut a hole in the sky
Planet in a Petri dish
Interference hit and miss
Soon there wont be rivers to cry
Gods pitch shift way out of time
Created an ape
Infected with the spark of divine
Mix X with the Y chromosome
One to destroy
The other tries to find a way home
We co-create our own fate
Everythings connected
God in man, man from ape
Everythings connected
