Feel My Pain

It's been a thousand years  
Shed a million tears  
But one thing lasts forever  
The scars of love will burn you deep inside  
As you step across that flaming deep divide

Climbing up the walls  
I've been through it all  
And threw it all away yeah  
The scars of love burning deep inside  
As you step across that flaming deep divide

The man above is watching in the sky  
Take a step across that flaming deep divide

A young man prays a friend betrays  
It's all the same now it's all the same to me  
Lie awake lie in state it's too late now  
To change what's meant to be

Consecrate desecrate seal you fate now  
Doesn't matter much to me  
Can't you see can't you see  
Don't, don't turn away feel my pain  
Don't, don't go astray feel my pain

Feel my conscience slip away  
As my body levitates  
Better hold on tight  
'Cause the earth tonight will shake  
Burning at the stake

So don't, don't go away feel my pain  
And don't, don't go astral feel my pain  
And don't, don't walk away  
Feel my  
Feel my pain
