You have some lovely children and a lovely wife  
You have a lovely bank account and had a healthy life  
But you do knew this day was coming  
It was always meant to be  
Your doctor says it times to have a colonoscopy  
Chorus:  
Oh colon, colon  
Colonoscopy  
A wonderful procedure as everyone can see  
Your number's up, it's time to take one for the team  
It's right there on the schedule  
Colonoscopy

There is a preperation that you should know about  
You have to drink this fluid that will surely clean you out  
They'll take a certain instrument to take a look inside  
In honesty it can be a bumpy ride

Chorus:  
Oh colon, colon  
Colonoscopy  
A wonderful procedure to help prevent disease  
Stay close to a bathroom and careful when you sneeze  
You can't get away from  
Colonoscopy

It's not a lot of pleasure, it's not a lot of fun  
But now you're turning 40 so you know it must be done  
It's not an ordinary exam  
You lay down on a table and then "Thank you ma'am"

Oh colon, colon  
Colonoscopy  
A wonderful procedure I'm sure you will agree  
Never underestimate how thorough they will be  
It's time to take your medicine  
Colonoscopy
