Creek goes ripplin' by  
I've been barefootin' all day with my baby  
Brown leaves have started fallin'  
Leadin' the way

I like it best just like this  
Doin' nothin' all the way  
So let's lay down in the tall grass  
Dreamin' away

And all I wanna do is let it be and be with you  
And watch the wind blow by  
And all I wanna see is you and me go on forever  
Like the clear blue sky

Slowly, there's only you and I, I  
And all I wanna do is watch the wind blow by

Girl, you know you told me not so long ago  
Let it come, then let it pass  
And all your troubles and your sorrows  
They won't last, last

So let me kiss you now, little darlin'  
Beneath this autumn moon  
Cold winds, another season  
Will be here soon

And all I wanna do is let it be and be with you  
And watch the wind blow by  
And all I wanna see is you and me go on forever  
Like the clear blue sky

Slowly, there's only you and I, I  
And all I wanna do is watch the wind blow by, yeah

All I wanna do is watch the wind blow by  
All I wanna do is watch the wind blow by
