Could not find Venus on the Roadmap
So rather than fold it .. I blew it out of the hatch
There's no room for error on this star-craft
This morning an alarm went
I turned it off.

I turned it off.
(I turned it off for the tenth time today)

We'll get to venus on the rebound.
Aboard a rocketship that will never let su down.
Boarding terra-firmians for a week's round
This morning an alarm went.
I turned it off.

I turned it off.
I turned it off for the tenth time today
Throwing caution to the peasents and copper to the
wind.

You know it's a free sin supper.
So go long or go home.
And though it's so freezing up there
We go long or go home.

We'll get to Venus on the rebound.
This morning an alarm went off
I turned it off

I turned it off
I tunrned it off for the tenth time today
Throwing caution to the peasands and copper to the
wind.

You know it's a free sin supper.
So go long or go home.
And though it's so freezing up there
We go long or go home.

Turn in off
I'ld turned it off for the tenth time today...

Could not find Venus on the roadmap
We'll get to Venus on the Rebound
Fucking right I turned it off
I'd probably keep turning it off
I'd advise you to do the same.
