Fuck the boundries fuck the borders fuck the political warfare

Fuck the traps, fuck the bricks we get stupid on every word

Yeah we get stupid on every word they say

Is all that I am and all I have worked for to amuse the corrupt

Delightful

Is all that I am and all I have worked for to amuse this breed

No!

Fuck the boundries fuck the borders fuck the political warfare

Fuck the traps, fuck the bricks we get stupid on every word

It's annoying to see millions of bugs are investigated to create

These stupid killing robots regardless of everything

And when the silence speaks switch over to automatic

And when the curtain falls consider yourself as target

And when the silence speaks switch over to automatic

And when the curtain falls nail them on a cross

This breed plagued us

This breed controls on their own

This breed plagued us

This breed controls by the crown
