TV news and radio always broadcast world's bad news
first

I'm sick of fucking news that makes me feel so bad

There are always good and bad times
But it is, you know, the way of life
Remember to believe your friends and family

No one wants to be alone, so take a look around
You need to say "Fuck you" to civil indifference

The world it's not so bad
Without the darkness, there is no light
The world it's not so bad
See the sky, it's clear and high
The world it's not so bad
Once you get out of the door, everything is gonna be
alright
Let's go
