Whoooo

You've gotta get high on the mountain  
And see what's going on  
You've gotta get high and see what's going on  
Well, if you don't see what you want  
You've gotta climb a little more

You've gotta get down on your knees  
And get right with the Lord  
You've gotta get down and get right with the Lord  
Well, if you wanna walk those streets of gold  
Stop a-knocking on the Devil's door

Well, now, you might not be a preacher man  
Never played in a southern band  
You can take a trip to the promised land  
As long as you understand

You've gotta roll with the changes  
And see what life will bring

You've gotta roll and see what life will bring  
Just spread your wings like an eagle  
And fly high, wild and free

Well, now, you might not be a preacher man  
Never played in a southern band  
You can take a trip to the promised land  
As long as you understand

You've gotta get high on a mountain  
And see what's going on  
You've gotta get high and see what's going on  
If you don't see what you want  
You've gotta climb a little more

If you don't see what you want  
You've gotta climb a little more
