Something wonderful

Something wonderful is happening here
It's indescribable, don't let it disappear
Take this moment now before it's lost
Give yourself away, don't count the cost

We got love
That's all that's really here now
We got love
And all we need is now

Come and go with me, let's enjoy the view
Make this day complete, forget your solitude
This time has come for us so take my hand
It's written on your face I know you understand

We got love
That's all I feel here now
We got love
That's why we're still here now

All the wait of the world
Is the universal wait
It states you and I
And the way we feel today

We got love
That's all that's really here now
We got love
And all we need is now

We got love
I see it in your eyes
We got love
And it's a beautiful sign

Something wonderful is happening here
It's indescribable, don't let it disappear
