I bow my head to sleep
The world moves on cause they can't see
In my eyes and in my dreams
The things I wish would be

Wake up I beg you please
Cause I can't let go easily
Behind my tears and in my dreams
The things I wish would be

Now you're far away
And I know you can not stay
Forever in my life this way
But in your eyes I saw your dreams
And all I wish would be

It's hard sometimes without you here
But I'll get by just give me a year
Through my heart and in my dreams
The things I wish would be

Now you're far away
And I know you can not stay
Forever in my life this way

But in your eyes I saw your dreams
And all I wish would be
Now I want you here with me
That's all my wish would be
