W/O You
I thought I heard your voice
But all I heard was void
Remembered by the sounds of life
Without you

I thought I saw your face
But all it was, was me in a daze
Hypnotized, mesmerized
Without you

Oh oh whoa without you
Oh oh whoa without you
What should I do without you

You think ya got me down
But all you did was turn my world around
You made me smile, made it all worth while
Without you

You're the song I'll never sing
The melody that haunts me in my dreams
My one & only sad lullaby
The one that made me cry
But it's alright...I didn't die

My life seems cruel without you
There's nothing new without you
So what should I do without you
