You've seen the drive in my eyes
Made you run for your life
Scared I would run you over, lover
Standing next to me you feel too small
And you can't deal with that - Not at all

You wanna go - Go
I don't need you, Baby
I don't know - No
How we got tangled up in the first place
So do - Do whatever you want to
It's not me, it's you
Babe, it's not me, it's you

You see I get what I need
Never have to ask a man - please
You don't like it even so you're leavin'
Standing next to me you feel so-so
And you can't deal with that
No - No - No

All I asked was for your love to fuel me on
I've give you just the same
We could've been so strong
But you're so fragile Babe, you can't help
Breaking down - down - down
You wanna find the girl
Who'll give you back your crown
