If we all could help our environment
Just a little every day
Some respect would be ok
If we all could help
If we all could help
If we all could help
Environment don't stop the clock
Bring it back
Bring it back
Bring it back around
Bring it back bring it back
When the sky is clear and blue hear me say I love you
Bring it back
Bring it back
Bring it back around
Bring it back bring it back
When the sky is clear and blue it seems to me it's
cooler
Bring it back bring it back around
Oh the wave of progression's gone from sea to sea
We live in disposable societies
How about a little respect
A little bit goes a long long way
Turn your engine off
Yeh you got nice toys smart boy
A nice day is not an orange haze
Over your head like the city's ablaze
Blue skies frogs and butterflies
Bring it back
Bring it back
Around
Bring it back bring it back bring it back around
Bring it back bring it back
When the sky is clear and blue hear me say I love you
Blue skies frogs and butterflies
