The ice is melting, the climate's getting hot  
Bees birds butterflies species disappearing  
Who cut the forest for the money in the chop  
Who's clear cutting the forest  
Global warming yeh  
They rock to the forest and they rock to the chop  
I can't dance this mess about  
This abomination  
You and I let's take the seed won't be  
so heavy  
You and I let's put some in  
Rock to the forest where the eyes will be looking at you  
Rock to the forest and you stick the shovel in  
You walk to the forest and you stick the shovel in  
They chop chop chop chop green trees they make  
oxygen  
I can't dance this mess about this abomination  
Wood for the fences and the wood for the deck  
chop chop chop  
Wood for the matches and you light the cigarette  
chop chop chop  
I'm not down on christmas but chopping trees  
ain't great  
What if all those Christmas trees could be making our  
air sweet  
You and I we'll take the seed won't be so heavy  
oh yeh  
One by one we'll put some in everyone can help  
oh yeh.....  
You and I in our own backyard we rock to the forest and  
we stick the shovel in  
Plant a tree
