Earthlings we have detected your planet is failing  
You have destroyed your eco system  
The people appointed as guardians have failed by way  
of a lack of vision.  
Your culture has been dominated by greed and lack of  
regard  
for one another  
Those who have taken the most have done the worst  
And you have lived by their design  
But now you must listen to your eco culture  
They will help you to change your social constitution  
To think for yourself  
And to begin to regard your fellow man, your planet,  
your life,  
as something to be cherished not disposable.  
Believe there is hope and you each have the power to  
do your part  
You must return to farming, and learn to protect the  
planet  
Your water your air before your quest for wealth  
Earthlings  
There is no where else for you to go  
This is a message from deep space.
