Now what you need I got it  
Hey, yo, Toni now what you need I got it  
Dark child, now, what you need you got it  
Yeah, Lets go

Let me tell you how it goes when I handle mines  
You know who, you with no one else can cross the line  
Your let it be known, I'm your girl that's why  
There's no need to roam, you can just call me any time

What your looking for you can find in me  
All I want to do is spend sometime with you  
All your fantasies will be reality  
I'll be all that you dream so come and be with me

And you'll see that, what you need  
I've been waiting for you  
So decide if you really want it  
What you need I've got more than enough

Believe it I've got it, what you need  
I'll be available to you 24/7  
What you need, I got all of me  
Everything that you need

That you need  
That you need  
That you need  
That you need  
That you need  
That you need  
That you need

Now that I've got your attention  
Let me tell you how I feel  
Ain't say this no more  
Cause I'm laying it down for real

Ain't no need to go and cheat  
There's no need to lie  
Don't go wasting my time  
Cause if your mine your all mine

What your looking for you can find in me  
All I want to do is spend sometime with you  
All your fantasies will be reality  
I'll be all that you dream so come and be with me

And you'll see that, what you need  
I've been waiting for you  
So decide if you really want it  
What you need I've got more than enough

Believe it I've got it, what you need  
I'll be available to you 24/7  
What you need, I got all of me  
Everything that you need

Can't you see I've got what you need  
If tonight is for real I'll give something to you too  
Do you realize fantasize, what you want to do  
Look around can't you see, I've got what you need

What you need  
I've been waiting for you  
So decide if you really want it  
What you need I've got more than enough

Believe it I've got it, what you need  
I'll be available to you 24/7  
What you need, I got all of me  
Everything that you need

What you need  
I've been waiting for you  
So decide if you really want it  
What you need I've got more than enough

Believe it I've got it, what you need  
I'll be available to you 24/7  
What you need, I got all of me  
Everything that you need

That you need  
That you need  
That you need
