By the black sea it will commence

I come borne by my brother war

My summoner I will infest, janibeg decimated in furious phase

Carry me in capitulated corpses, for a welcome in terror in Kaffa

My presence made certain when they feel the odour of rot

I will blacken them in meat, by loin and arm

Poison the waters of the threatened soil

With my claims I will bring no cure

I will let them know for three days, no more

My wrath is cometh, be freed from cure
