Torment
"Slaves Of Technology"

In computers we trust
Turn our world to dust
We don't notice the detail
That computers can fail
We are all slaves of technology
Part of technical insanity
Fight against the command of industry
Technical slavery
The government wants population
Without mental calculation
'cause it's easier to control
Stupid creatures without soul
We all slaves of technology
Part of technical insanity
Fight against the command of industry
Technical slavery
If we don't think at all
And only listen to the computers call
The power of our land
Will be in the computers hand
We are all slaves of technology
Part of technical insanity
Fight against the command of industry
Technical slavery
Mutated biology
False destiny
