Feel a chill in the spine
Lost in this place called Dreamland
Lights shinning in the sky
Things so strange to understand
Tales of ET's, spread in our minds
Lies in high degree
Rip the night like a sight with amazing velocity

When they appear in the night
The fear and the perplexity
With your ships crossin' the sky
Bringing the old prophecy
Fire, water, death, destruction!

Hidden files keep secrets that can't be revealed
Tales of aliens working with humans
It's to surreal!
Building a new technology
Advanced memory, made by ET's
A new way of life or this a new way to kill

[chorus]

UFO! Disturbances in the night
Owing to this new form of life
Divine gods from another space
Or black demons bringing disgrace!

This is the area 51...

When they appear in the night
The fear and the perplexity
With your ships crossin' the sky
They are bringing the old prophecy...
Prophecy!!!
