Are you afraid? Are you still afraid?
Or are you escaping from yourself?
Dark can you feel it? Eclipse do you feel it right now?
Can you take it for your whole life or not?

When will it stop? How will your will control it?
Leave it all and think about the right path
No matter what. Burn incinerate the bad thoughts
Expulse the inner thoughts that plague you

Doubts and choices side by side
Pulsing soul that never dies
Keep your mind ablaze
This is life and all is done
Doubts and choices side by side
Pulsing soul that never dies
Keep your fucking mind ablaze

Free to choose things are passing by
The good... the evil are fighting in your mind
Lose the fear in choosing what's right or wrong
Facing the inner fear makes you... stronger

Trying to kill the black sun
No time to lose. Can't take this pain no more
Dredging through the darkness to find sunrise
Deep down inside. Seek that hidden inner pride
Reflex aware return again

There's no black sun
No!
