The third war is breaking out  
Some spectators standing about  
Forces in motion, virtual war  
Digital armies marching on before  
Boundaries worldwide must be made  
Against a terrorist crusade  
Cybernetic power is invincible  
This kind of war is invisible

Crackers, hackers  
Code of deciphers  
In the cyber core  
Disrupting...  
Destroying...  
... in the cyberwar

Like a military organization  
Notable for it's high information  
They command, control and reach their goal  
I'm feeling that some heads are gonna roll  
Malicious software prepared to attack  
Computers, sensors, data tracks  
Cybernetic power is invincible  
This kind of war is invincible

Imagine an army of crackers coming to the fore  
Bringing chaos to the order marching in a war  
Technology  
In obscurity  
Is cracking systems  
Of security  
Infecting  
Invading  
Our privacy

A new battle is happening on the virtual floor  
Denial of service in the web  
Don't try anymore!  
A new world  
A sad reality  
What's the future  
Of this mentality?

To kill?  
To fell?  
Orga and Mecha more and more unreal
