When the sky turns black without a trace of light
Panic starts to domain this strange night
And I feel fire in my brain
Try to save this land in vain
Everything on earth is clear
Hypocrites screaming: "Doomsday is here!"
Look into my eyes...
Your fate is to die!

Reality's the unholy spell
Listen to the final bell
Reality's the unholy spell
And this world's a living hell

I see pain and suffering everyday
Humans beings in deep decay and misery
It's hard to believe!
Violence in first degree
What can I say about peace in a world of pain?
Where the population stands in disdain
People dying by starvation...
A land without salvation

[chorus]

Reality's...
A living hell
So follow...
My unholy spell!!!

Superiors smashing any focus of resistance
Using their habitual ignorance to kill
This is the true ill!
A world in flames, their deepest will
Maximum violence is the only law
Like a razor blade cutting so raw
Look again to my eyes
Now you're gonna die!!!

[chorus]
