"Ignoring Pain"

Fear the pain of light
In your dark room
Close your eyes now
Pain is coming through

No one hears you cry
As you tear your eyes out
Welcome death
The fear of everyone

You are left alone
As you tear your heart out
The fear of everyone

Ignoring pain you drove it away to the far side of life
and death
Ignoring pain you drove it insane fall on the pain

Dwelling in madness through mindfields of the sun
Whores of sinful fire controlled by lust

Fall on your knees - fall on me
Fall on your knees - fall on the pain

Incompetent sun that could not shine
Fight for lasting that could not be won

Falling in sadness the truth of everyone
Home is where your corpse is forgotten now

Lies of deception the vicious one
Killer of emotions hiding in the sun
