I knew from the moment I saw you  
My bad luck in love was all in the past  
How true, been so high it's unreal  
And this feeling reminds me of  
laughing gas

How square that our Age is Atomic  
It's kind of tragicomic too  
But we can laugh away our blues, Babe  
Long as it's just Me and You

I fell just like Adam for Evie  
When I took one bite of that fruit thou hast  
How swell, to be groovin' so easy  
Just like we were both sniffin'  
laughing gas

We gotta make this feeling last  
This feeling's just like laughing gas

This world's full of sadness and sorrow  
And poets say happiness never lasts  
But Girl, it's today not tomorrow  
And we got a full tank of laughing gas
