Some people get hung up on their history  
and all the things they used to be  
now the future is all we've got  
sometimes it dont seem a lot  
There it stands shining brightly  
its in the distance  
far away  
its the answer and we don't know it  
you cant understand what it says

so you want to go away now  
no ones asking you to stay now  
so you want to go away now  
you say you need a chance...

There it stands shining brightly  
its in the distance  
far away  
its the answer and we don't know it  
you cant understand what it says

so you want to go away  
no ones asking you to stay  
so you want to go away  
no ones asking you to stay
