"His Master's Noise"

Visit "[His Master's Noise](#)" on MotoLyrics.com

As you behold the man amid the city - hall
Eliminating ugly sounds, to get the right control
He's said to be the master of the dancing waves
Just making all things ready now
No troubles left and
That's when it starts
His master's noise

He's always everywhere on places where you need him
To lend an easy helping hand, he's everybody's friend
He's fading the final sounds and so the end is here
The audience is cheering but
The show is over
That's when it stops
His master's noise
