She said: where did all the water go?
As she ran to the beach
A crowd began to follow
With the answer soon to reach
The wave approached in anger
And the earth shook underneath
Everything was washed away

[Chorus:]
Unleash my soul
And make me whole [x2]
But save my love

Where did all the people go
And are some within reach?
I surface numb & hollow
From the grip of this defeat
A wave begins to feed again
As the earth shakes underneath
Take a breath and brace yourself

[Chorus]

[Bridge:]
Save the lives of those I love
Cause I believe I'll see them all again
Take me if you must cause I'm ready
