Isn't it true - what I heard about you  
Isn't it true - that your love has gone and you're alone  
now  
Tell me is it true - you feel so blue  
And isn't it true - that you need a helping hand right  
now  
Isn't it true  
[\*]  
When fire meets the water  
All of your loving  
Is Leading to an end - to an end  
[CHORUS]  
There's another time and another place  
There's another smile and another face  
And when you see the end of a rainbow  
There will be someone like me  
Another time and another place  
There's another love and another moment  
Make it happen for a lifetime  
There will be someone like me  
(There will be someone like me)  
And someone - someone like you  
Isn't it true all this things about you  
Isn't it true - that a broken heart needs to mend now  
Tell me is it true - there's someone new  
And isn't it true - that you need to move along now  
[(\*) & Chorus]  
Just take my hand I'm there for you  
[Chorus to fade]
