

## Tragedy "Force Of Law"

Blindly followed out of fear, out of  
Desperation for something more than this  
The remnants of a life once significant  
The remnants of minds once thoughtful  
The remnants of hopes once realized  
The force of law, the defeating of all life  
The defeating of all life, defeat, defeat  
Kept in line for years and years  
Patience, obedience, clenching fists  
The force of law, the defeating of all life  
The defeating of all life, defeat, defeat  
The pressure's mounting, shown in our vacant eyes  
Hardened by never ending stares and obstacles  
Unsurmountable, unsurmountable  
Blindly followed out of fear  
Blindly followed history  
Blindly followed out of obedience  
Blindly followed out of fear, fear, fear
