[Sample] I know that love was meant for two  
& while we're apart I'm supposed to wait for you

[Trailblaza]

Yes!

How yall feeling out there man?

Oh me? I feel good

Thank you, thank you you're far too kind

Chorus:

I know that you miss me

But you'll never get me

Cause lady I'm gone

I heard that you dissed me

You're no longer with me

So get the hell on

You got me singing like "la-la"

It's a great day to be single

To break up and just mingle

I'm like "la-la"

It's a great day to be single

To break up and just mingle

Verse 1:

They say the first cut is the deepest, that strikes me  
kinda hard

Ya see my last lve was most recent, & still it left a scar

So now I say this shit in pretense, I loved her

But still she couldn't keep it real with me, so fuck her

I'm learning not to sweat it, forget it live and learn

It only hurts you if you let it, and Usher felt that burn

So no longer will I regret it, why waste time?

& since emotions are priceless, why waste mine?

Lady let's face it

I told you the truth til I was naked

You, put your heart in a box and told me I could take it

Few, months into it foolish don't think we're gonna  
make it

Yet, we try to climb but I resign I hate to break it to you

But girl our love is getting so see through

"I feel unappreciated" - me too!

Well enough is enough we through... we through  
Dueces

Chorus

Verse 2:

They say the first love is the sweetest, relationships are  
hard

My last one was just decent, but still it left a scar

So now I say this shit in pretense, I let her

Into my heart, but games she starts to play so I left her

I know you gotta live so you can learn

Gotta give so you can earn

But all these visits to my crib got me left with nowhere  
to turn

So - why'd you do that?

Our chances - the window, I lift it up and threw that

Say you care then prove that

I told you the truth til I was naked

You, put your heart in a box and told me I could take it

Few, months into it foolish don't think we're gonna  
make it

Yet, we try to climb but I resign I hate to break it to you

But girl our love is getting so see through

You feel unappreciated - me too

So enough is enough we through... we through  
Oou!

Chorus
