"Dogs In Space"

Might explode, out come dark, facing off into space
Dogs out there, floatin' 'round, it's rattling the human
race

Dogs in space

Planet opens, out come dark, facing off into space
Underneath the eye of God, angels in the sham of
dogs

Dogs in space, dogs in space, dogs in space, dogs in
space

Warming coat, coats of gleam, threw up stars, charged
and still

We are tough from an open can, dark flash in, can it be
real?

Dogs in space, arf! arf!

No offenses, we are cats, they know cats, then we'd be
mice

Master plan, massive dogs, run for cover, you don't
look twice

Dogs in space, dogs in space, dogs in space, dogs in
space

We're lost, we're lost...Ahhhhh...
