Lock you up throw away the key sooner than they'll set
you free never admit they were wrong, that's right I
don't care what you pay there's no justice in the USA
people die with a trial tonight why do you just hesitate
rise on up and smash the state free your mind throw
down your chain I can see only one solution people
unite in a revolution never let their money rule again
sneak attack at my back I feel the flak as you lack I see
right through you but anyway in every way you're the
same sneak attack at my back I feel the flak as you lack
I see right through you but anyway- in every way- I have
to watch you all play the game, yeah feel the pain in
your brain feel the strain it's insane and I feel the same
but anyway in every way meditate feel the pain in your
brain feel the strain it's insane and I feel the same but
anyway in every way people watch and laugh at my
dismay, yeah
