Look into the future, what do you see
I really need to know now, is there a place for me
Tell me, where do we go from here
Take me as you find me for what I am
And when I make mistakes please understand
And as long as I know you're near
There is nothing for me to fear
Out of the darkness a light shines
Burning through the coldest nights
And we can find a way (together we'll make it)
With every step we take (moving closer together)
If we're gonna survive
The dream must stay alive
Baby will you hold me when I'm afraid
See me through the danger 'till the break of day
If there's love there's a change for me
Just believe in yourself you'll see
Out of the darkness a light shines
Burning through the coldest nights
And we can find a way (together we'll make it)
With every step we take (moving closer together)
If we're gonna survive
The dream must stay alive
And as long as I know you're near
There is nothing for me to fear
Out of the darkness a light shines
Burning through the coldest nights
And we can find a way (together we'll make it)
With every step we take (moving closer together)
If we're gonna survive
The dream must stay alive
