I see right through you like you are made of glass  
Now she won't reply Obsessed with the beauty you  
illness spreads  
No one can save you now no one can save you no one  
can save you now  
No one but yourself can save you now  
Sick thoughts run through your mind when will this ever  
stop  
Every pill seems more bitter than the last this vile mind  
is dark  
This is the perfect time to lie perfect disguise  
This torment never ends live with this till you die  
She tells me everything
