She knows she likes it  
When they play loud  
She knows she likes to  
Move her body, body to the sound

She is redefined, she is so divine  
It's a wonder how this girl can really be alive

She's singing melodies that I've never heard before  
She's got those bright eyes  
And they're pulling me in, pulling me in

We're on the dance floor  
And the night is young  
She must be poisonous  
For I think I've just been stung  
I'm dancing close  
The beat is on our side  
I wonder what it'll take to call you mine

She's singing melodies that I've never heard before  
She's got those bright eyes  
And they're pulling me in, pulling me in

You're dancing for me now  
And I can tell by the look in your eyes  
You're dancing for me now  
And I will tell you that I don't mind  
You're dancing for me now  
And your bracelets are so elegant  
You're dancing for me now  
And I will say you must be godsend  
Yeah

Before you walk away, and you leave me a-alone  
Take my digits girl, call me on the phone  
The music's dead  
The dj's had his fun  
I look around, she's gone  
After her I run

She's singing melodies that I've never heard before

She's got those bright eyes  
And they're pulling me in, pulling me in

You're dancing for me now  
And I can tell by the look in your eyes  
You're dancing for me now  
And I will tell you that I don't mind  
You're dancing for me now  
And your bracelets are so elegant  
You're dancing for me now  
And I will say you must be godsend  
Yeah

Dance with me, dance with me  
Oh, girl, yeah, oh girl, yeah

You're dancing for me now  
And I can tell by the look in your eyes  
You're dancing for me now  
And I will tell you that I don't mind  
You're dancing for me now  
And your bracelets are so elegant  
You're dancing for me now  
And I will say you must be godsend  
Yeah

Dance with me, dance with me  
Oh, girl, yeah, oh girl, yeah
