Come and invade our world

Yea, yea

You know the plight of us

All the pains and the strains that this life covers

Things never go right, it's the gripe of us

It's like life came and took all the life from us, from us

Was supposed to go this way, hearts cold from coast to coast this days

Full of hope and nope it's gone, this grave

We need light and life to come invade

This cold world ain't nice to us

We so blind like the sights took our sight from us

I know you heard it more than once kinda like stutters

But this world needs help, all the likes of us, of us

What a lonely road is paved, with some broken souls that groan midways

On our domes we long to go get away, we cant go it alone come on invade

In this broken world we wanna find a way,

Cause it all went wrong, tell me who can take it away

Invade our world (come and invade our world)

Invade our world (come and invade our world)

You know the place where we placed at

It's like loves been erased they replaced that

There's no food in the crib where they plates at

The kid got shot in the place where he plays at

Jay said this can't be life,

I'm lookin' at the world like this can't be right

We lookin' for the light but we can't be night

We lookin' for our health but we can't see right (see right)

Comin' y'all we gotta face facts

His years go, tears roll down the face

When he had a lot of hope it would fade black

Now he cold and he ain't really fazed at anything

Anything his face seems light,

cause his moneys out like they made three strikes

Needs something to come down invade these nights

A real life Hero need that'll make things right

In this broken world we wanna find a way
Cause it all went wrong, tell me who can take it away
Invade our world (come and invade our world)
Invade our world (come and invade our world)

Yea

I know of some folks thinkin', this dude trippin' what he
drinkin'

What kinda little dream he chasin',
he gonna spend his whole life waitin' (I'm waitin')
For someone to come down to change this song,
but not just me man creation groans
We are waitin' for someone to erase this wrong
The Kingdom is here the invasion's on

In this broken world we wanna find a way
Cause it all went wrong, tell me who can take it away
Invade our world (come and invade our world)
Invade our world (come and invade our world)
Come and invade our world
Come and invade our world
Come and invade our world
Come and invade our world
