### "After All"

Visit "[After All](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Night-  
And the world is fast asleep  
I will hold you here and keep  
All our secret dreams and plans

You-  
Never thought our love could last  
Now you've put that in the past  
Cause you finally understand

That after all  
The times you told me that we'd never be good  
together  
After all the things you said  
That made me think that you'd never call  
Now you've turned around and told me  
That you want to stay here forever  
And you're back here in my arms  
Where you belong  
After all

We-  
All the promises we made  
All the words we never said  
Never knowing what was right

You didn't know-  
That the love we used to share  
Wasn't cause it wasn't there  
We'll make up for it tonight

That after all  
The times you told me that we'd never be good  
together  
After all the things you said  
That made me think that you'd never call  
Now you've turned around and told me  
That you want to stay here forever  
And you're back here in my arms  
Where you belong  
After all

We were young  
And your dreams took you places far from me  
I was wrong  
To believe  
That you'd go  
Cause here you are

That after all  
The times you told me that we'd never be good  
together  
After all the things you said  
That made me think that you'd never call  
Now you've turned around and told me  
That you want to stay here forever  
And you're back here in my arms  
Where you belong  
After all
