I know i'm closed minded
But these problems i'll work out
I've got to try

I tried to be with you
But got turned down, i got rejected
And every time i picture you
My mind becomes infected
With your smile

Do you still want me to want you

Remember the time when
You got drunk at one of my shows
And i drove you home
We parked out front and kissed all night
Until somebody saw us
You lost your earrings in my car
But got 'em back in july
I tried to be with you

Do you still want me to want you

I know i'm closed minded
But these problems i'll work out
I've got to try
